Product highlights

2GB storage capacity

A useful 2 GB gives you the capacity to swap and share much larger or more files via the USB port of your PC or laptop.

Fast data transfer

High-speed data transfer rates significantly cut annoying waiting time when you're copying large multi-media file to or from your computer's harddisk.

Exclusive design

With its smooth curves, high-gloss white and a soft-touch rubber finish, the Philips USB Flash Drive is an exclusive device with a stunning design.

Integrated cap

The cap to protect the USB connector is integrated in the product design so that it stays attached to the drive when not in use and is impossible to lose.

Activity indicator

An appealing glow shows you the drive is properly connected and working, and pulsates faster when copying files to or from its memory.

UFD software included

A complete software suite is included, which will run automatically from the UFD and gives you access to useful features like file synchronisation and password protected disk partition.

Write protection switch

The USB Flash Drive features a write protection switch to ensure valuable data is not unintentionally deleted or written over.

Password protection

With password protection for all or a user-definable section of the USB Flash Drive's memory, your personal data is protected from unauthorised access or copying.

Handy neck strap and keyring

Thanks to a choice of a neck strap or a keyring to attach to your USB Flash Drive for carrying, it will always be easy to find when you're on the move (only available on selected models).

USB extension cable

A USB extension cable is supplied with the Drive for added convenience, particularly with desktop PCs where the USB port is difficult to access at the back of the machine (only available on selected models).
